

Pre-Season Heater Check- Ups

Your heating system needs to be professionally cleaned and tuned up annually for safe and efficient operation. Properly serviced equipment could save you up to 10% on your energy costs. Not only can you reduce energy costs, but you will be extending the life of your equipment and the likelihood of smaller problems developing in to costly repairs.

Our Multi-Point Inspection Includes:

- **Cleaning, lubrication, and adjustment of your burner**
- **Cleaning of nozzle, checking of oil strainers and/or filters**
- **Inspection and necessary adjustment of burner controls**
- **Vacuum cleaning of smoke pipe**
- **Vacuum cleaning of boiler and/or furnace**
- **Inspection and vacuum cleaning of combustion chamber**
- **Inspection of heel of chimney and cleaning if necessary**
